## School Entrance Systems That Last.

Special-Lite, Inc. school entrances last longer because they are built better. The heart of the entrance, the SL-17 FRP flush door is built with tough modern materials using advanced manufacturing techniques. The door has an exceptionally high strength-to-weight ratio. It can withstand abuse that defeats much heavier doors.

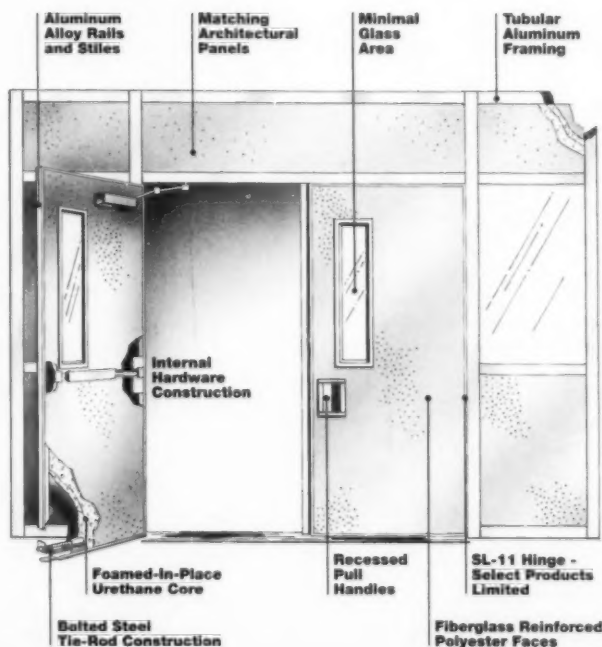

Heavy duty hardware, anodized 1/8" wall aluminum tubular frames, and matching insulated glazing panels complete the integrated entrance system that can be custom-manufactured to your specific architectural and functional requirements.

At your request, we will send you an informational packet explaining why Special-Lite entrances have a proven history of delivering years of outstanding performance with minimal maintenance.

**Guaranteed for five years.**

## Do your buses pass the cold weather test?

**E**spar's diesel-fired heaters can preheat engines for easy starting and provide interior heat for passenger comfort. And you can avoid the problems of using ether or electrical plug-ins.

If your buses spend even an hour a day idling in cold weather, you're wasting fuel and causing excess wear to the engines. Call us. We can help.

## If They Were School Districts They'd All Have AAA Ratings

ASBO's finance and accounting books have a proven track record among school business officials. They're known to be well written and packed with time-tested tips on improving the efficiency and cost-effectiveness of school operations. Their popularity attests to their value, just as a good bond rating attests to a school district's financial soundness.
